

The logo features the text "Medi-Dose" in a bold, blue, sans-serif font, with a registered trademark symbol (®) to its upper right. Below it, the letters "EPS" are written in a larger, bold, blue, italicized sans-serif font, also with a registered trademark symbol (®) to its upper right. The background is a white blister pack with a grid of circular indentations, some of which are filled with a light blue color. A thick blue curved band runs across the top and bottom of the image.

## Unit Dose Packaging

## Specialists in unit dose packaging

When packaging and dispensing medications, nothing is more important and constant than patient safety and medication accuracy. At Medi-Dose/EPS, it is our mission to provide unit dose packaging and bar code labeling that is safe, efficient and cost-effective.

For over 50 years, we have collaborated with pharmacy, nursing and other health care departments designing and implementing systems to solve the specific, often unique, challenges of their practices. That's why Medi-Dose and EPS have become leaders in unit dose packaging and bar code labeling — for solids, liquids, syringes, IV's, ampules... even equipment and supplies. Let us help you as we've helped facilities all over the world with their unit dose and bar coding needs.

***Patient Safety... Error Prevention... That's Medi-Dose®/EPS®!***

**The  
Medi-Dose®  
System**

**Medi-Dose® – the leader in  
solid oral unit dose packaging**

**3 steps to  
use Medi-Dose**

Medication is placed in each  
Medi-Cup Blister.

Lid-Label Cover Sheet is placed  
over filled Medi-Cup Blisters.

Labeled Medi-Cup Blisters  
are separated at perforations  
for use.

**Medi-Dose was started with a simple idea...** to package and dispense predetermined amounts of medication to be accessible for one dose. After 50 years, we've become the leader in solid oral, unit dose packaging by listening to the needs of health care professionals like you.

**Regardless of your facility's size,** equipment, budget or medication requirements, Medi-Dose helps you with your packaging needs. Tamper-Evident, Moisture Resistant and Ultraviolet Inhibitant, 15 options of blisters and a wide array of label printing options provide you complete flexibility. There's no glass, metal, large capital expense or formal training required.

**When used with our dynamic MILT® software,** Medi-Dose reduces the potential for medication error. Print whatever information you need...text, bar codes, tall-man lettering, graphics, shapes, symbols and reports.

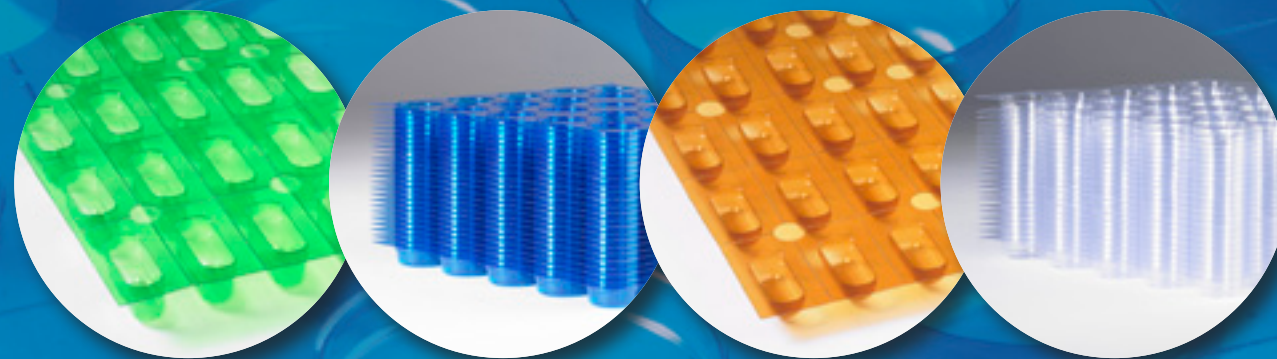

**Medi-Dose®  
is ideal for  
USP 800 meds!**

**See how easy it is to design an  
affordable Medi-Dose system  
that's just right for you!**

**U.S. & Canada: 1-800-523-8966 / Worldwide: 215-396-8600 / MediDose.com**

**All You Need  
To Get Started  
With Medi-Dose®**

**Medi-Cup® Blisters**

**15 styles to suit your packaging needs including our  
new wider and deeper Multi-Purpose Blisters**

**MILT® Software**  
Design and  
manage  
Lid-Label Cover  
printing.

**Fil-Form® Template and  
Roll-E-ZY® Press Piece**  
Aligns Lid-Label Covers to  
Medi-Cup Blisters and ensures  
positive seal between labels  
and blisters.

**Lid-Label® Covers**  
Laser or Direct  
Thermal labels to  
seal your blisters  
and identify your meds.

**Packaging  
solid oral  
unit dose**

# Medi-Dose® Medi-Cup® Blisters

15 styles to suit your packaging needs

Medi-Dose has become the dependable, inexpensive unit dose packaging system of choice for health care facilities around the world. Regardless of your facility's size, budget or packaging requirements, Medi-Dose has a cost-effective, safe option for you.

Available with **Nultraviolet®** light resistance and with 6-month or 1-year beyond-use dating, 15 styles of Medi-Cup® blisters have been designed to meet your needs.

Medi-Cup blisters are:

- Simple to use
- Inexpensive
- Easy to store
- UV inhibitor
- Moisture resistant
- One-year or six-month beyond-use dating
- Tamper-evident
- 8 sizes & 15 styles accommodate virtually all meds
- Ideal for USP 800 meds

Mini—  
where space  
in bins or  
cabinets is at  
a premium

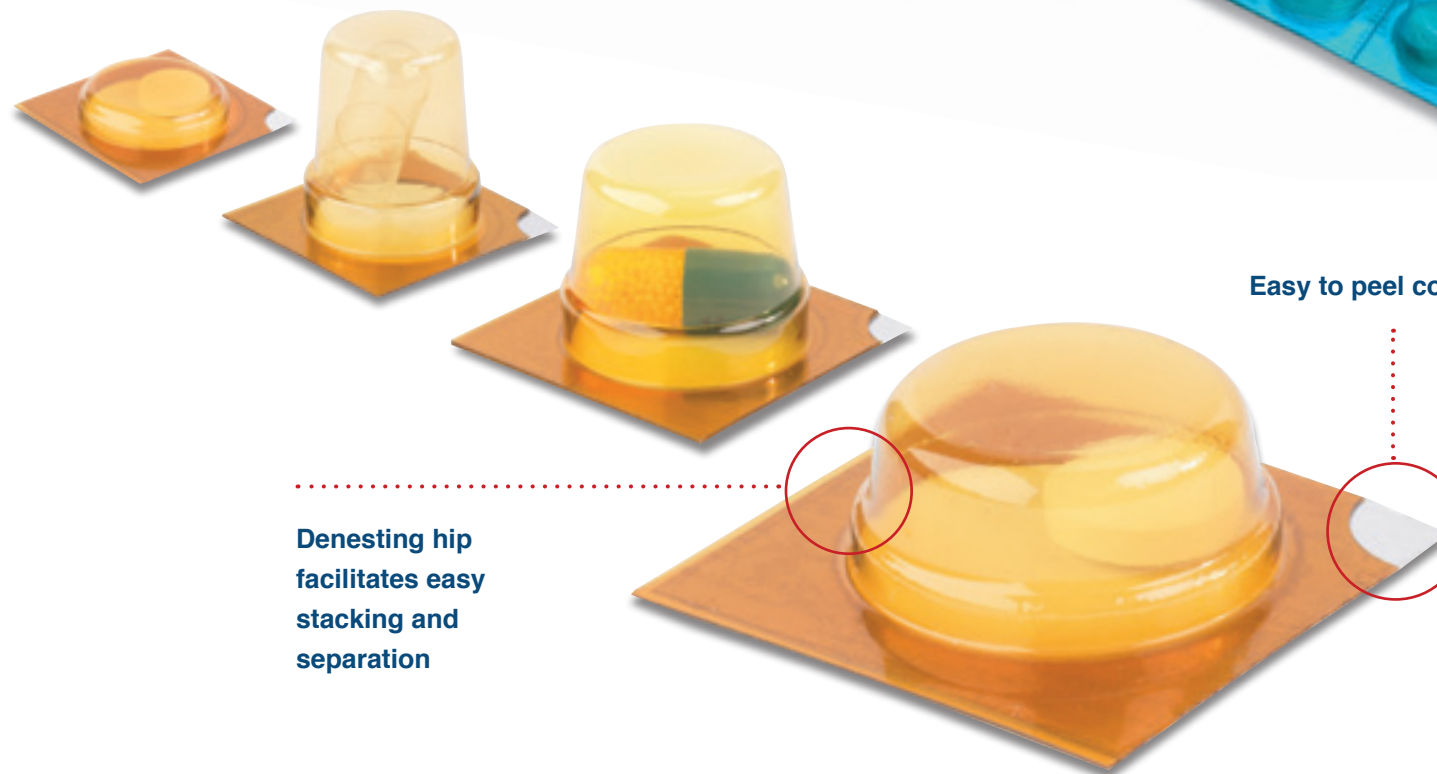

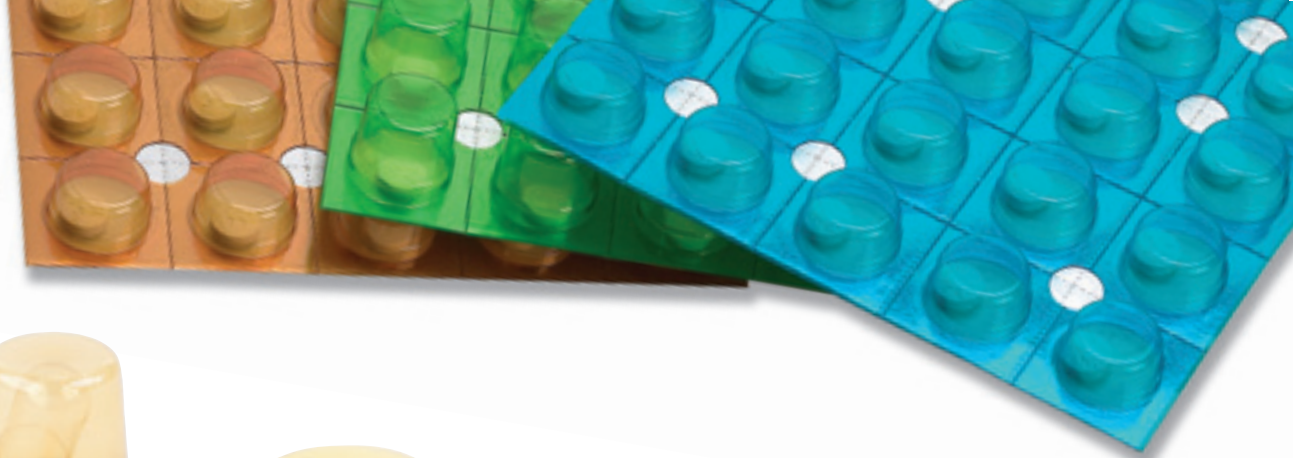

Standard—  
accommodates  
most sizes of  
tablets or  
capsules

Deep—  
ideal for double  
“0” capsules or  
large meds

Jumbo—  
designed for compounded  
drugs, AIDS medication,  
veterinary pharmaceuticals

MPB—  
Designed for larger meds,  
repackaged unit dosed  
drugs, suppositories,  
irregularly shaped items,  
unit of use medication,  
anything that fits

Ovals—  
for specific size requirements of  
various automated dispensing cabinets

Denesting hip  
facilitates easy  
stacking and  
separation

Easy to peel corner

Sealed with our Lid-Label® Covers, Medi-Dose provides you with a tamper-evident package that's easy to open, readily identifiable and bar code ready!

**Labeling  
solid oral  
unit dose**

## Labels for solid unit dose

For use in both laser and thermal printers

**Often the most important interaction** you will have with members of your patient care team will be through your labels. Medi-Dose helps you clearly and concisely communicate the vital information needed to provide the best possible care and to reduce the potential for medication error.

**Constructed with a unique combination** of an aggressive tamper-evident adhesive and a moisture-resistant foil liner, our Lid-Label® Covers provide moisture resistance and medication protection in even the most challenging of climates and conditions. Plus, additional log and identification labels are provided for use in log books or medication bins.

**Our Lid-Label Covers** provide ample area for medication identification. They can accommodate:

- Bar Codes – 1-D (linear) and 2-D symbologies
- Tall-Man Lettering – to call attention to look-alike and sound-alike medication
- Graphics – Warning Pictures (e.g., NIOSH, RCRA warnings), Hospital Logos, etc.
- Shapes and Colors – calling attention to vital information

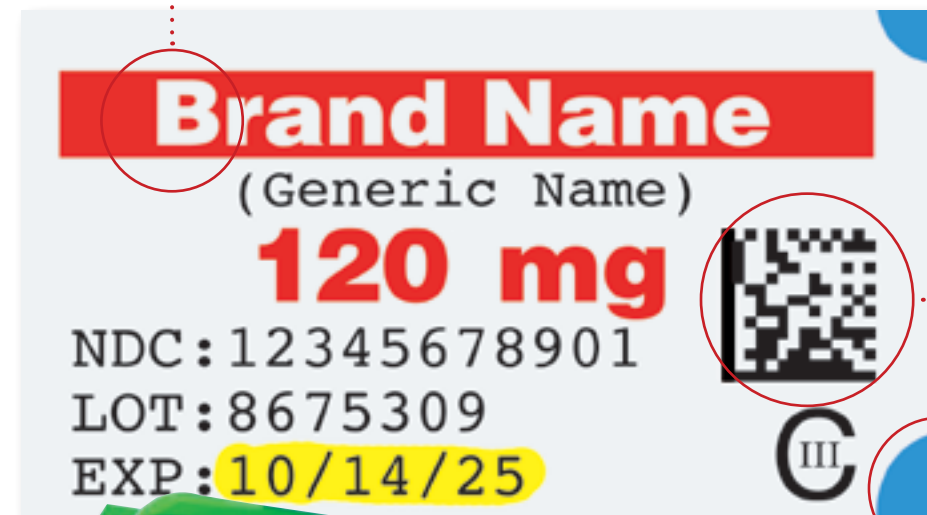

Use our colored Laser Lid-Label Covers to package and organize your inventory your way — by day, week, month, classification of drug—any way you choose. And when used with our blue and green Medi-Cup® Plus™ line of conventional and UV inhibitor blister sheets, you can place 12-month beyond-use dating on your Medi-Dose packages.

**New!**

## Brightly Colored Lid-Label® Covers for Special Handling

Clearly identifying medications that require special handling, such as those covered by USP <800>, is important for the safety of your staff and patients. To assist in your efforts, Medi-Dose® has created Brightly Colored Lid-Label® Covers for use with our Circular, Oval and MPB Medi-Cup® Blisters. Like all our Lid-Label Covers they provide a tamper-evident and moisture resistant seal. When printed with our powerful and easy MILT® software, 1-D or 2-D bar codes, graphics, special fonts, tall man lettering, shapes, logos and symbols (such as bio-hazard, NIOSH, etc.) can be utilized to further highlight important dispensing information and minimize the potential for medication error.

**Medication Identification. Use tall man lettering, any graphics, fonts, shapes, logos, etc. Color printer support.**

**2-D Bar Coding capability.** Read and write all of your unit dose data from one small 2-dimensional bar code using our MILT® software. Include NDC, lot number, expiration date and more.

**Easy-to-peel corner also lets you color-code and organize your labels your own way.**

Available for use with both laser and direct thermal printers, you can print as many labels as needed.

**MILT®**  
Innovation  
at its best!

# MILT® 4

## Powerfully Easy

### Software for Unit Dose Labeling

### Simple. Convenient. Flexible.

- Designed with pharmacists and healthcare professionals to reduce medication errors, simplify bar coding and improve packaging workflow and reporting.
- Compatible with BPOC and BCMA systems to synchronize bar coding information for all departments.
- Can be installed on an unlimited number of computers for easy data sharing.
- Includes pre-designed label templates or easily allows custom designs to contain as much information as you prefer.
- Laser and direct thermal labels accommodate solids, liquids, syringes, IV's, ampules, equipment and supplies.
- Print Linear and 2-D barcodes with data from up to seven fields including NDC, lot numbers and expiration dates.
- Includes the FDA NDC database of medications (updated at no cost), notifications when medications are added that are on the "CDC NIOSH List of Antineoplastic and Other Hazardous Drugs in Healthcare Settings" and compares entered text for both Tall Man Lettering suggestions and within the ISMP "List of Error-Prone Abbreviations, Symbols, and Dose Designations".

1

#### Choose a Medication

- Scan Bottle to Import from Included NDC Database
- Automatic Date Calculation Saves with Medication
- Control Who Can Edit, Save and Delete Information
- Prompt Users for Specific Fields (Optional)
- Customizable Field Names
- Formulary Grouping and Sorting Options
- Include Controlled Symbols (1, 2, 3, 4, 5 or I, II, III, IV, V)

2

#### Choose a Label

- Label Selection Saves with Medication
- Supports All Medi-Dose® and LiquiDose® Laser and Thermal Labels
- Labels Designed Specifically for Pharmacy Use with Aggressive Adhesives for Maximum Durability
- The Perfect Labels for Solids, Bottles, Syringes, Ampules, Bags and Anything You Package

3

#### Choose a Template

- Template Selection Saves with Medication
- Add Data Fields, Fixed Text and Formula Fields
- Add 1-D or 2-D Multi-Part Bar Codes
- Add Shapes and Images
- Use Tall Man Lettering
- Supports Any Windows Compatible Font
- 256 Colors for Fonts, Fills and Outlines

4

#### Preview and Print

- Remembers Printer, Tray and Alignment Settings for Each Label Type
- Choose Quantity of Doses, Log 1 and Log 2 Labels
- Print Log Labels for Your Paper Log Book
- Approve Print Jobs Before They are Recorded in Electronic Log History (Optional)
- View and Print Log History for Approved and/or Rejected Print Jobs and All User Activity

**Labeling  
liquid unit  
dose**

## Labels for liquid packaging

**LiquiDose® Labeling – available in Rectangular, Square, Mini, Butterfly and Flag & Receipt styles**

All LiquiDose Labels are available for use with laser, ink jet and direct thermal printers and can be easily imprinted with our MILT® software. Bar Codes, Graphics, Special Fonts, Tall Man Lettering... even Logos, Symbols and Pictures... can all be included on your labels. LiquiDose labels are designed to adhere to all dispensing containers, even those with tight circumferences. Whether you're packaging large or small doses, liquid unit dose, syringes, ampules, IV meds or odd shaped containers, we have the labels for your job.

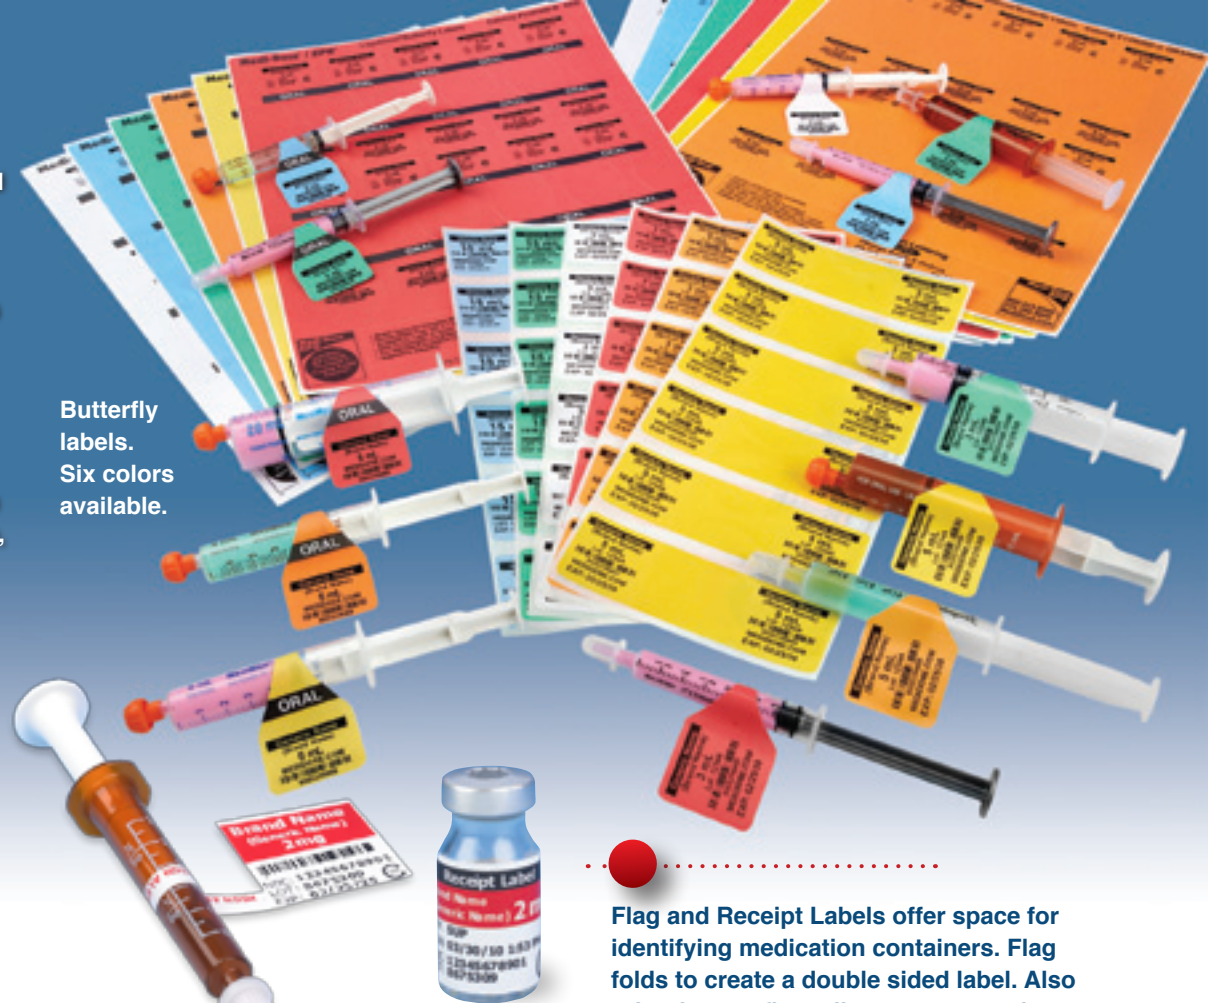

MILT software includes a built-in library of auxiliary and warning images that can be placed on any label.

LiquiDose Label. 1" x 3" size lends itself to a variety of uses...medication bottles, bin identification, log report books... Use with laser, ink jet and direct thermal printers.

Mini LiquiDose Label. 7/16" x 1-1/4" size was designed for labeling syringes, ampules, small packages and "re-barcoding" applications. It can easily accommodate 5 lines of text and a bar code. The label's size makes it ideal for you to create your own Auxiliary Warning Labels.

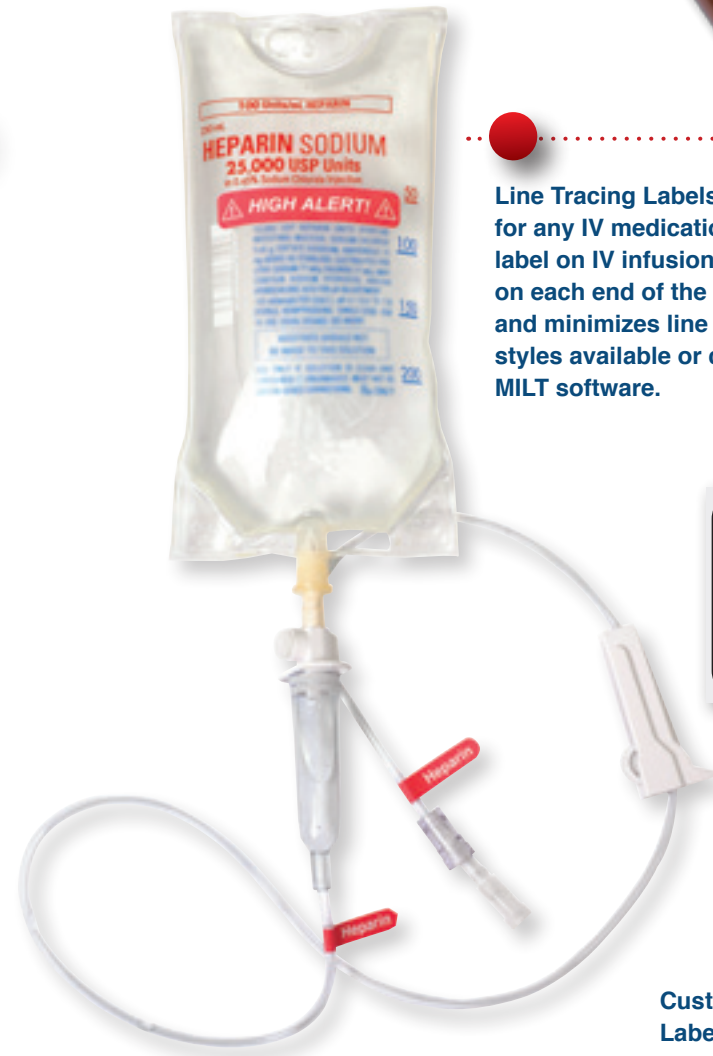

LiquiDose Butterfly Labels have a 2-wing design so they can be wrapped around syringes, ampules or oddly shaped containers. Each wing has a labeling area to accommodate multiple lines and a bar code. Laser Butterfly Labels have been produced in a durable, heavy stock to withstand rugged treatment in bins or drawers and are available in 6 colors (White, Blue, Green, Orange, Red and Yellow).

Butterfly labels. Six colors available.

Flag and Receipt Labels offer space for identifying medication containers. Flag folds to create a double sided label. Also print data on flag tail to wrap around syringe or ampule. Apply receipt to charts, records or packaging for tracking and accountability... or use as a secondary label for duplicate data or additional bar codes.

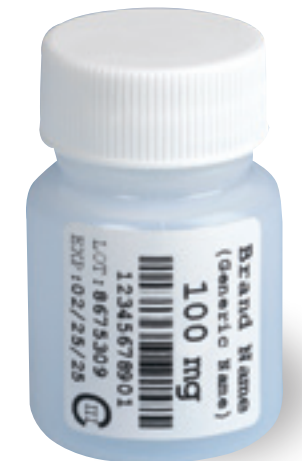

Line Tracing Labels facilitate IV line identification for any IV medication. Place large piggy back label on IV infusion container and smaller labels on each end of the tubing. Improves accuracy and minimizes line confusion. Many pre-printed styles available or customize your own using our MILT software.

3-part blank piggyback label

Customized Labels

Square labels in three sizes facilitate scanning on curved or irregular surfaces.

# Convenience

## Liquid Packaging

From bulk storage to unit dose delivery, EPS® offers a wide variety of bottles, containers, accessories and labeling ideas.

## TampAlerT® for no-leak, tamper-evident unit dose

**Twist on tamper-evidence for liquid unit dose  
that's child-resistant and senior-friendly**

### TampAlerT® System

1  
Dispense medication into  
TampAlerT bottle.

2  
Twist TampAlerT cap onto bottle.

3  
A secure, tamper-evident seal  
adheres to the bottle when you  
twist-off the cap.

**A twist of the wrist** is all it takes to dispense no-leak, tamper-evident unit dose. TampAlerT is the simple, fast and inexpensive system for packaging solids, liquids or powders.

**Security and convenience for all generations.** Ideal for legend drugs and controlled substances, in-patient, OPD or after hours dispensing, TampAlerT vials are available from 15 to 120 mL, in natural or UV inhibitant polyethylene with regular or child-resistant screw caps.

**Providing manual tamper-evidence** was never so easy and cost-effective. See for yourself why TampAlerT® is the right solution for your packaging needs.

**Tamper evident seal is contained within each cap**

**Square LiquiDose® Labels** were designed with TampAlerT bottles in mind. The label's size makes it ideal for scanning bar codes around the tight circumference of small bottles.

## Oral Syringes & Dispensers

make any bottle into a  
Ready-to-Dispense  
Medication Reservoir.

### Oral Syringes

For Quick and Accurate Dispensing of Small Doses of Oral Medications.

- 4 Sizes to Accommodate Minute Doses
- Graduated in mL and fractionated teaspoons for easy measuring
- Manufactured from Durable Polypropylene
- Amber Syringes Provide Protection for Light Sensitive Meds
- Special 0.610" Tip Won't Accept Hypodermic Needles, Minimizing Incidences of Medication Administration Errors
- Permanent, Heat Etched Graduations (Sizes Over 1 mL)
- Easy Identification of Fluid Levels

### Oral Dispensers

- Innovative One-Piece Plunger
- No small parts - reduces risk of choking
- Graduated in mL for easy measuring
- Large flange area for easier dispensing
- Low Capacity Tip Reservoir

ENFit Compliant and Compatible Products  
also available. See [medidose.com/enfit](http://medidose.com/enfit)

### NOW AVAILABLE: Metric Only Syringes

- Meets ISMP Recommendations for Metric Only Graduations
- 8 Sizes for Versatile Dispensing
- Clear with Orange Graduations, Clear with Blue Graduations or Amber with White Graduations
- Amber Syringes Provide Protection for Light Sensitive Meds
- Easy Identification of Fluid Levels
- Fits EPS® Press-In Bottle Adapters
