High Alert Line Tracing Labels

The easiest way to implement line tracing!

- 3 Part Piggy-Back Labels
- Helps Identify High Alert Meds
- Provides End-to-End Line Tracing
- Promotes Medication Safety
- Preprinted High Alert Meds
- Laser or Thermal Customizable Labels
- Easy to Use and Cost Effective
- Custom Printing Available

Because of the potential for catastrophic errors caused by line confusion, labeling and line reconciliation have been recommended by standards organizations for years, but facilities have struggled with the logistics of implementing a workable system - until now....

Our Line Tracing Labels make it easy to label and trace IV lines...for any medication in any setting (hospital, home, clinic). Pharmacy simply places the entire label on an IV infusion container. When the medication is administered at the bedside, nursing applies one line label to each end of the tubing. This facilitates easy line traces, improves accuracy and helps minimize IV line confusion.

**3-part Line Tracing Label
is placed on
infusion container.**

**Line Tracing Label is easily
removed and placed at the
top of the line.**

**Second Tracing Label
is placed at the bottom
of the line.**

Some of Our More Than 100 Available Imprints:

TL-HA209 ALBUMIN
White Text on Tan Background

TL-HA178 ALTEPLASE
White Text on Red Background

TL-HA163 AMIODARONE
