

Assure-Trak[®] Compounding Management System: Dynamic Patient Specific

Dynamic Workflows

- USP <797> Compliant Documentation
- Intelligent Template Design for ALL CSPs
- Integration with Batch and Patient Specific Workflows

Flexible Configurations

- Configurable Off-the-Shelf Hardware
- Robust HL7 (FHIR) Message Protocol
- Remote Verification
- Image Capture

Innovative Solutions

- Cutting-Edge Formulary Management System
- 'Smart' Recall Management Processes
- High-Quality Configurable Labels

Protect Your Cleanroom Investment With Process Controls That Improve Safety, Quality and Efficiency

Enhanced patient safety with total visibility of Compounding Operations; Sterile, Non-Sterile Batch and Patient Specific doses.

Streamlined build limits IT efforts during implementation, and minimizes maintenance.

Reduces costs associated with missing doses, remakes and unnecessary compounds.
